CRIMPING TOOLS

CRIMPING TOOLS

NLCT1

NLCT2

NLRF1

- Manufactured specifically for use with Newlec terminals, these crimping tools will ensure a good quality compression joint.
- The requirements of BS 5750 and ISO 9000 management systems mean that working practices relating to crimping are now being put under greater scrutiny and the practice of mixing terminals and tooling is not to be recommended.
- The ratchet controlled tools in the Newlec range are compact, lightweight and easy to use.
- High precision investment cast jaws.
- Ratchet controlled to ensure precise and consistent crimping.
- Emergency release lever.
- Toggle action leverage to reduce operator effort.
- Automatic handle opening.
- NLCT1 for use with insulated terminals and connectors.
- NLCT2 for use with uninsulated terminals and connectors.

Crimping Tools for use with Terminals and Connectors

VDE APPROVED INSULATED TOOLS

VDE APPROVED INSULATED TOOLS

Applications on live equipment are subject to very special requirements. The focus is on absolute safety and **Defiance** tools demonstrate this with a high level of certification. Since 1920, the VDE Testing and Certification Institute has been actively involved in ensuring the electrical safety of machines, components, appliances and tools. It is an independent institution, concerned only with consumer safety. Only products that have been tested to strict criteria in the VDE Institute's Offenbach-based laboratories can be issued with the VDE Certification Mark.

VDE approved tools carry the VDE certification mark, recognised throughout the world as the symbol of safety and performance. Beware of tools offered as VDE on the basis of compliance to the international IEC 60090:2004 standard, this does not carry the assurance of safety through independent product testing and production auditing.

All Defiance VDE tools are VDE certified.

Warning - Choosing VDE approved tools is an essential first step in helping an electrician comply with electricity at work regulations, however it is essential that the tools are examined on a regular basis. Even the slightest damage can compromise the insulation integrity or potentially expose the user to the risk of injury or even death. We strongly recommend you replace worn or damaged VDE tools.

VDE SCREWDRIVERS

VDE Insulated

VDE Screwdrivers according to DIN IEC 60900 have been individually tested and meet the high safety requirements of these standards - type approval and permanent monitoring by the VDE.

- Insulation moulded directly onto the blade.
- High quality chrome vanadium molybdenum steel, through hardened black finish blade.

DFVS2.5

- Ergonomically perfect handle design.
- Tested to the professional CS standard.
- Each screwdriver is individually tested in a water bath at 10,000V according to DIN IEC 60900.
- Safe when working up to 1,000V and 1,500V DC.
- VDE insulated range handles - red/yellow.

FLOOR TO CEILING TOOL RANGE

Floor to Ceiling Electrician's Installation Tool Range

A range of innovative tool solutions to make jobs easier & faster:

- Infinitely adjustable hole cutters for all down-lighter hole diameters.
- EBS box sinkers for drilling back box holes in less than 2 minutes.
- Rapid action channelling chisels for running wires in brick & block work.
- Solid board cutters for repeat access under solid floors.
- Cable guide rods for easy reach and wire location.

When installing any lighting & power the floor to ceiling range is an essential part of the job – same time, less hassle, save money.

All prices subject to VAT at 17.5%.

127mm SOLID BOARD CUTTER

- Drill easy fix access holes in solid boards in under a minute!
- Rapidly cuts 127mm holes.
- No need for time consuming interjoist sawing.
- Solid removable plugs that lie flush with the floor.
- Carbide tipped design lasts up to 10 times longer.
- Set contains:
 - 1 x 127mm carbide solid board cutter
 - 3 x plastic caps
 - 1 x SDS adaptor
 - 1 x hex adaptor
